

Parent Communication/Update - COVID-19
March 15th, 2020

Online school access

Students will not have scheduled times when they will be required to be online for whole class general education instruction. Lessons will be available using video tutorials for students to watch when convenient.

Some teachers may schedule small group online chats to answer student questions or provide small group intervention, however, these will be coordinated with you as parents directly.

If you have older students or need to use your home devices primarily for your work/online university classes, please take this into account when answering the survey. We are asking how many devices you have in your home that are available for RA student use. Feel free to reach out to me directly if you have questions.
